CONTAINER CONNECTIONS PTE LTD

14 Tuas View Circuit, Singapore 639930

Tel: (65) 6862 9118

Website: www.containerconnections.com

Established since 2004, Container Connections Pte Ltd is conveniently located at No. 14 Tuas View Circuit.

About us

Container Connections Pte Ltd was established in 2004 with the aim of becoming a leading depot in Singapore providing quality service and a facility for shipping lines, leasing lines and freight forwarders, etc.

Occupying 8 acres of land at the address of No. 14 Tuas View Circuit, Singapore 639930, the premises houses a state-of-the-art corporate headquarters with an extensive computer/LAN network, depot management system and office administration/finance system.

Our depot spans 8 acres to allow a maximum capacity of up to 8,500 TEUs (8-high stacking).

Our People & Our Resources

We boast a team of highly experienced, ICCL certified surveyors and repair teams capable of repairing a wide array of containers ranging from Dry Units and Refrigerated Containers to sea-worthy, cargo-worthy and even IICL5 standard. In total, we have 25 office staff and over 35 qualified repairers and supervisors, all working together to ensure your container repair needs are well taken care of.

Our workshop is properly sheltered to ensure containers, especially reefers, are least exposed to direct rain and sunlight during repairs. It is also capable of handling a capacity of 20 TEUs of continuous repair for Dry Units and 12 PTI points for Reefer, while sufficient space in the workshop to accommodate a Container Stacker helps ensure speedier and smoother operations.

When it comes to our equipment, we insist on using the latest automated welding machine, steel bending and cutting machines, as well as materials that are compliant with shipping lines/leasing lines requirements. Proper drainage is also in place to ensure the proper disposal of wastes in accordance with all government rules and regulations.

Our ISO tank cleaning and repair facility can clean and repair up to 30 units of ISO tanks at a time.

Our Container Stacking Yard

Spanning 8 acres of land, our container stacking yard is well equipped with 6 units of Container Stacker (with up to 8-high stacking capacity) and 2 units of 10-tonne rated container forklifts. The surface of the yard is covered with hard concrete to keep containers in sound condition during their stay in our depot.

Our Depot Management System

Our depot's maximum capacity can reach up to 8,500 Teus (8-highstacking) and all stackings are arranged according to our Depot Management System to provide for smoother pick-ups and drop-offs.

We guarantee that your containers remain in top condition during their stay in our depot.

Container Repair & Maintenance

Our ISO tank cleaning and repairing facility is capable of handling the clean-up and repair of up to 30 units of ISO tanks at any one time. Armed with extensive experience, our team of skilled workers can handle a wide array of tasks including minor to major ISO tank repairs, testing or modification of the bottom valves as well as the installation of additional walkways and handrails.

Cleaning

Using a state-of-the-art cleaning system (that includes chemical dosing and use of hot and cold water), coupled with our in-depth knowledge of cleaning SBC tanks, testing of gas tanks and refurbishment of ISO tanks, we possess the necessary equipment and know-how to keep your containers looking like new. Having our very own fully automatic water treatment plant also allows us to handle both oil-based and chemical cargos.

Our certified workers can handle both minor and major repairs of ISO tanks, as well as perform modifications and installations.

Having our very own fully automated, waste water treatment plant enables us to handle oil base and chemical cargos.

Waste Water Treatment

Given today's increasing importance to be environmentally responsible, we have incorporated a fully automated water treatment system on our premises to treat waste water and prevent the release of harmful agents generated during the cleaning process. You can enjoy peace of mind knowing that your containers and the environment are in good hands when they are in our care.
